Personal Statement

I am currently studying IT Technical Support at UCOL and bring a diverse background in customer service, music, and warehousing. I possess my own vehicle and am passionate about working with people. I possess a high level of computer literacy and a strong drive to support others. I excel in listening and demonstrating empathy. I am committed to helping my team succeed and contributing to a positive and productive work environment.

Work History

Store Worker

Subway

05/2024 – 01/2025 | Auckland

My duties included general food prep and customer service as well as running and closing the store. These responsibilities I carried out alone every night and required me to be diligent and display a high level of maturity. I loved engaging with the wide variety of different cultures and people that come into the store due to proximity to Spark arena.

Store Person

Sakura Filters

10/2022 – 05/2023 | Auckland

My duties included picking and packing orders, utilizing a Reachtruck and Counterbalance forklift to store and remove pallets. I also engaged with customers a lot fulfilling personal orders that need to be picked up that day. I worked independently picking orders that had the highest priority as well as packing and sending them.

Tutor

Manawatu Musician Makers

02/2019 – 12/2020 | Palmerston North

My duties included teaching both Bass guitar and Drums to students ranging from 5 years old all the way up to 40 year old adults. It involved drafting a teaching plan as well as being able to engage the kids into being interested and involved in the lesson. I communicated with parents' homework as well as overall yearly goals.

Interests

- Music
- Technology
- History
- Exercise
- Gaming

Volunteer Work

- 2025 Gardening with ITA
- 2024 Vet Nursing Volunteer

Education

IT Technical Support
UCOL
02/2026 – 2026
Currently completing a comprehensive foundation in modern IT at UCOL, encompassing programming, relational databases, networking, web development, systems analysis, and hardware fundamentals. This curriculum bridges backend infrastructure management with practical, end-user technical support, combining hands-on technical problem-solving with collaborative project execution.

NCEA Level 3 - University Entrance
2020

Employment Preparations Program
Industry Training Auckland
03/2025 – 06/2025

Skills

- **Hardware Repair** — Custom PC building and diagnostics (AMD/NVIDIA architectures), thermal management, electronics repair (diagnosing power delivery, sleep sensors, and mechanical faults in devices ranging from Nintendo consoles to vintage audio equipment).
- **Software & OS** — Windows environment optimization, Linux CLI, BIOS configuration (including SVM/Virtualization), custom firmware installation, and software troubleshooting.
- **Networking** — Dedicated server deployment (Google Cloud Platform, Linux/SSH), firewall configuration, and performance profiling. Cisco experience (CLI and setup/configuration) and hardware deployment (various brands of Switches and Routers).
- **Programming & Web Development:** — Application development in C#, frontend design (HTML, CSS, JavaScript), and database querying with SQL scripting, utilizing Visual Studio Code as a primary environment.
- **Database & Systems Analysis** — Relational database design, Entity-Relationship Diagram (ERD) modelling (mapping 1:M and M:M relationships), data normalization, and system requirements analysis.
- **Infrastructure & Virtualization** — Self-hosted homelab configuration utilizing Proxmox, network-wide ad blocking deployment, bash scripting, and cloud server administration across Microsoft Azure and Google Cloud Platform.
- **Technical Support & Client Communication:** — End-user troubleshooting, translating complex technical issues for non-technical users (backed by extensive front-line customer service experience), and collaborative agile teamwork.
